

FOR IMMEDIATE RELEASE

Wavelink Terminal Emulation to be Pre-Loaded on Latest Duros Mobile Computer

MIDVALE, UTAH and TEMPE, ARIZ. — APRIL 7, 2009 — Wavelink Corporation and RMT Inc. today announced that Wavelink® Terminal Emulation software has been selected for the Duros™ 1214 rugged mobile computer. This strategic agreement builds on the more than a dozen mobile device manufacturers pre-licensing and/or pre-loading Wavelink software. This number represents nearly all of the largest device manufacturers in the industry. As a result, Wavelink's software is licensed and/or preloaded on more manufacturers' products than all of its competitors combined.

Duros delivers a complete line of fully rugged computers for mission-critical applications deployed in challenging environments. The Duros 1214 terminal was specifically designed to meet the rugged atmosphere in warehouse and shipping environments. Each Duros 1214 will ship with Wavelink Terminal Emulation software pre-loaded and ready for activation by the customer. This gives Duros customers access to the industry-leading software for connecting their devices to host systems.

"We designed the Duros 1214 to be the most versatile and rugged warehouse terminal on the market," said Eric Miller, general manager for the Duros product line. "The addition of Wavelink Terminal Emulation software complements that objective by enhancing the automation, productivity and efficiency of mobile workers in the warehouse."

In addition to Wavelink Terminal Emulation, Duros customers can easily add voice capabilities for data capture and communication with Wavelink Speakeasy™. The entire network of mobile devices can also be managed from a central console with Wavelink's device management solution, Avalanche Mobility Center™.

Wavelink president, Lamar Van Wagenen, said, "In these challenging economic times, companies are looking for solutions that deliver ROI from a vendor they trust and know will be there to support them in the years to come. As the de facto leader in terminal emulation, Wavelink provides Duros customers with solutions to improve the efficiency of their mobile workers."

The Duros 1214 is now shipping with Wavelink Terminal Emulation. For more information, please visit www.durostech.com/products/1214 and www.wavelink.com/emulators.

About Duros

Duros is one of three product lines of RMT Inc., the leading provider of fully rugged, highly customizable hardware solutions for challenging environments. Engineered by JLT, Duros' fixed-mount terminals and tablet computers provide ultra-rugged computing solutions for the most demanding conditions. The fixed-mount terminals range in size from 10- to 15-inch screens. Duros is based in Tempe, Ariz. Visit www.durostech.com or call 480-705-4200.

About Wavelink

Founded in 1992, Wavelink Corporation is the leading provider of multi-vendor mobile application development and mobile device and infrastructure management software. Wavelink's technology solves the unique challenges involved in deploying, managing and controlling today's enterprise mobility systems, and facilitates peak performance from frontline staff. Wavelink's emulation product family is the industry standard in providing host connectivity solutions. More than 8,500 companies in the retail, manufacturing, government and logistics industries rely on Wavelink to accelerate application delivery, reduce device management and support costs, and tighten network security. For more information, please visit the company's website at www.wavelink.com, or call 888-697-9283 from the USA and Canada or +800-9283-5465 outside the USA and Canada.
